Presents  
An Online Webinar**

**Tuesday, February 15, 2022  
4:00PM- 5:30 PM**

**Jaimie P. Cloud  
Sustainability Education**

Jaimie cares passionately about “The potential of schools and communities learning and working together toward sustainable community development.”

In this 90 minute webinar Jaimie Cloud of the Cloud Institute for Sustainability Education will introduce the concepts of Sustainability, and Education for Sustainability. The Cloud Institute is dedicated to the vital role of education in creating awareness, fostering commitment and guiding actions toward a healthy, secure and sustainable future for ourselves and for future generations. She will explore with participants the Education for Sustainability Framework and the many ways we can embed this vital way of thinking into the core curriculum and 21st Century instructional practices. We will discuss the unique role that Education plays as we shift toward a healthy and sustainable future, and will unpack student work as evidence of the “different way of thinking” Einstein invited us to consider when he said, “The significant problems we face cannot be solved with the same thinking we used to create them.” Education for Sustainability is that “different way of thinking”.
